

Thyroid cancer is NOT a “good” cancer

When found early, thyroid cancer is usually treatable.

However, some thyroid cancers are aggressive and difficult to treat.

Even when treatable, thyroid cancer is life-disrupting, expensive, and stressful for us and our loved ones.

It also requires us to take daily medication for thyroid hormone replacement for the rest of our lives

For these and many other reasons, thyroid cancer is not a “good” cancer. No cancer is.

Get the facts. Find free services.

Visit www.thyca.org to find out about:

- Neck checks for early detection
- Thyroid cancer testing, treatment, and research
- Free support groups, one-to-one support, publications, and educational events

Get a free information packet, newsletter, support services, and details about coming events.

We've been helping people with thyroid cancer, and their families and friends, since 1995. Wherever you are in the world, we're here to help.

For our award-winning educational web site, free awareness brochures, free newsletters, support groups, and conference/workshop information, contact us.
