

RADIOIODINE THERAPY FOR THYROID CANCER

Free educational workshop

Anca M. Avram, M.D. University of Michigan

May 9, 6-7:30 p.m. at the Cancer Support Community

RSVP to 734-975-2500

Join us for a free educational workshop on radioiodine treatment for thyroid cancer. Topics will include:

- How risk factors play a role in treatment decisions
 - Use of pre-ablation scanning to individualize treatment plans.
 - Ways in which treatment is approached from low risk to high risk disease
 - Long term follow up and the use of follow up scanning to assess the effectiveness of treatment
 - Scanning for thyroid cancer which cannot be seen with Radioiodine scans
- Ample time for Q&A will be provided
